Cindy,

RE: Sunnyside Mine

I am following up on some items that Bill Y. raised about a month ago. Here is some information on the Sunnyside Mine in So. Colorado.

According to Carol Russell, Max has met with Dave Holm (CDPHE Water Director) about this topic. Right now, the State is working on a cleanup settlement with key parties, most notably Sunnyside Gold which owns the mine.

As you'll recall, Bill has suggested a meeting on this topic of State and EPA key players. Max believes that the timing is not yet right to hold this meeting since the state is heavily involved in settlement negotiations. Therefore, we will wait to hear from Max on when the "right" time is. Plus, what's most important is that Max and Dave Holm are talking.

(Carol, if I've stated anything inaccurately, please help out)

RE: Leadville

As you know, there was a meeting with Patti Shwayder scheduled for 12/1 on Leadville. However, this meeting has been cancelled. Not sure when it will be rescheduled.

Please let me know if you need more info.  
Diane
